Audience Sentiment — evidence for Project #1

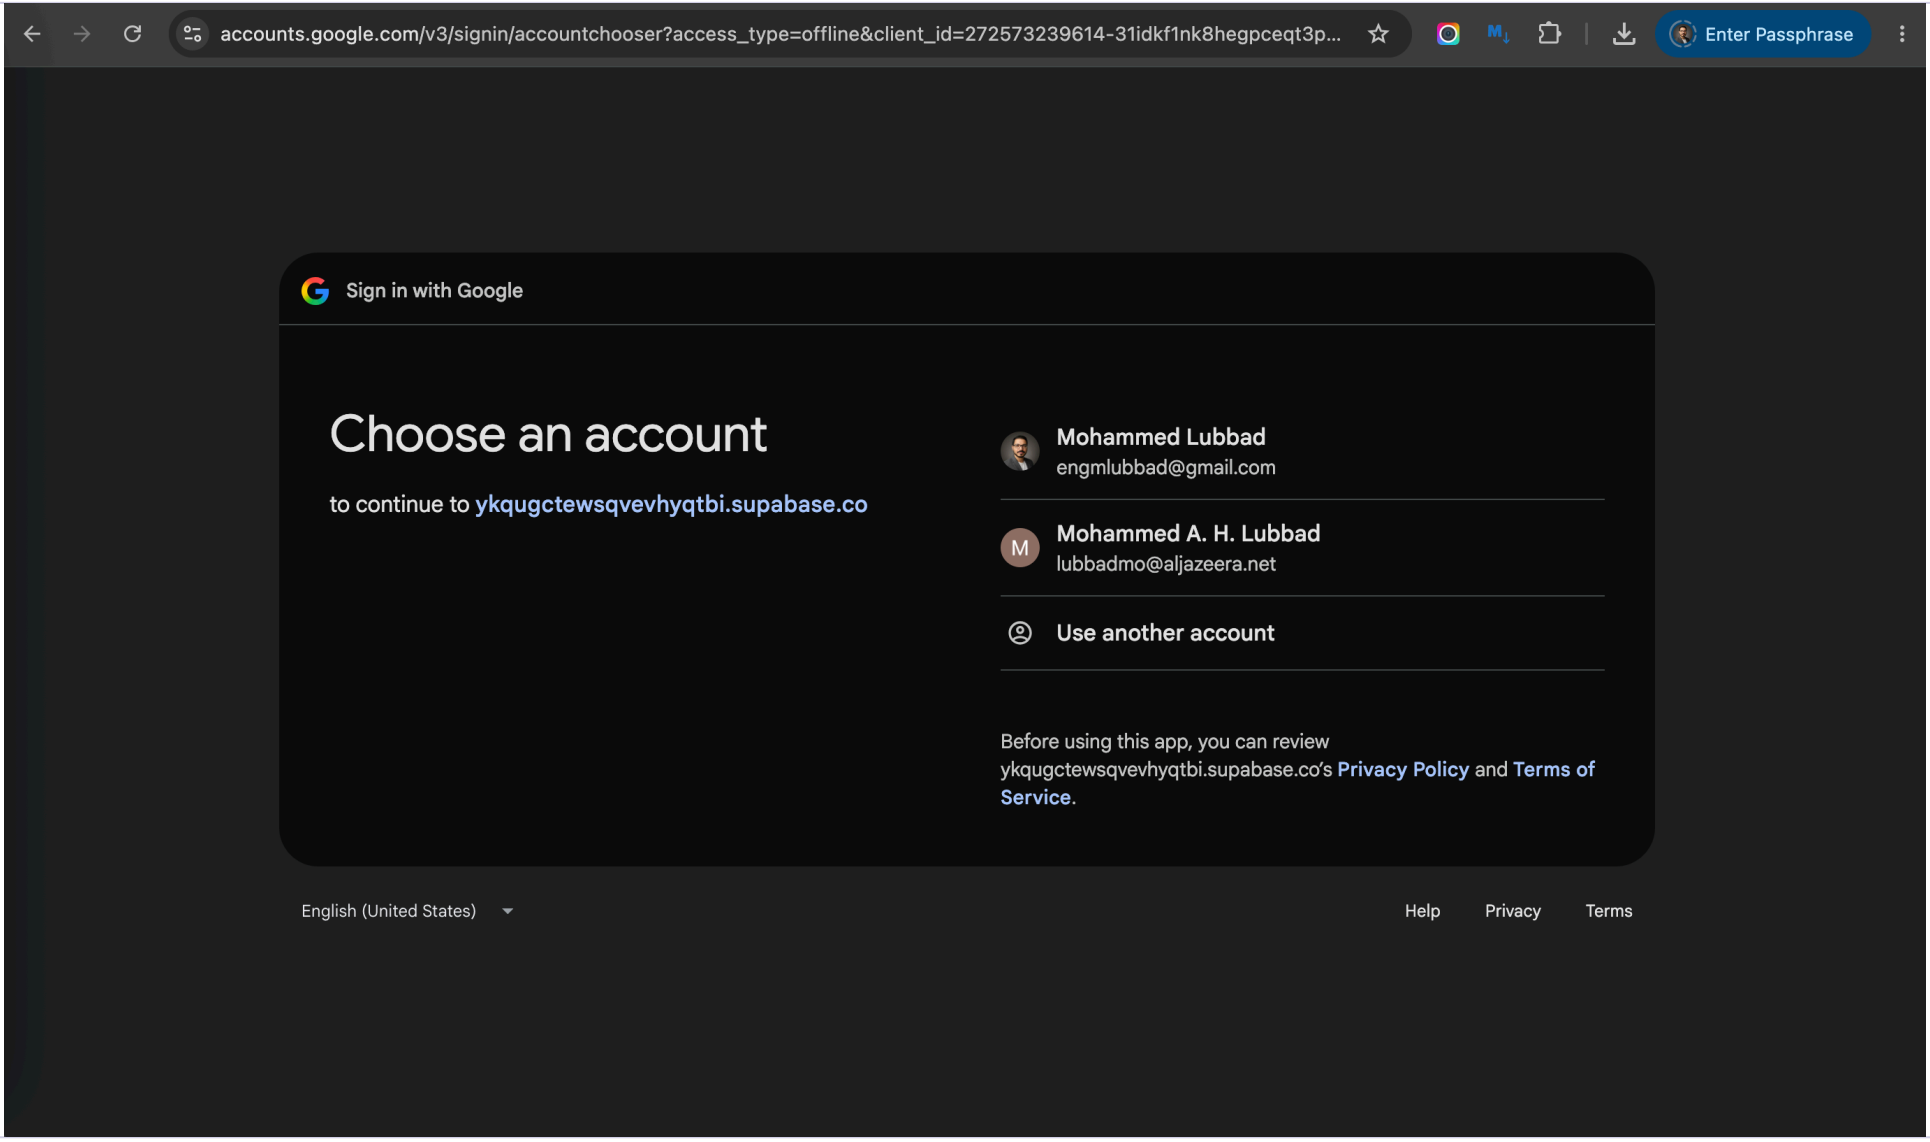

API client: **Audience Sentiment** · https://app.sky-develop.net · Google Cloud project 272573239614 · prepared 2026-09-16.

Conditional evidence supplied: **(a) OAuth flow** (consent screen, scopes, revocation) and **(d) Dashboard / feature screenshots** (Analytics & Reporting). (b) and (c) do not apply: the application neither uploads nor embeds a player.

Each page states the URL it was captured at and what it shows. In-app pages were captured from the production preview on 2026-09-16 while signed in as the channel owner (the interface is Arabic-first; an English interface is one switch away).

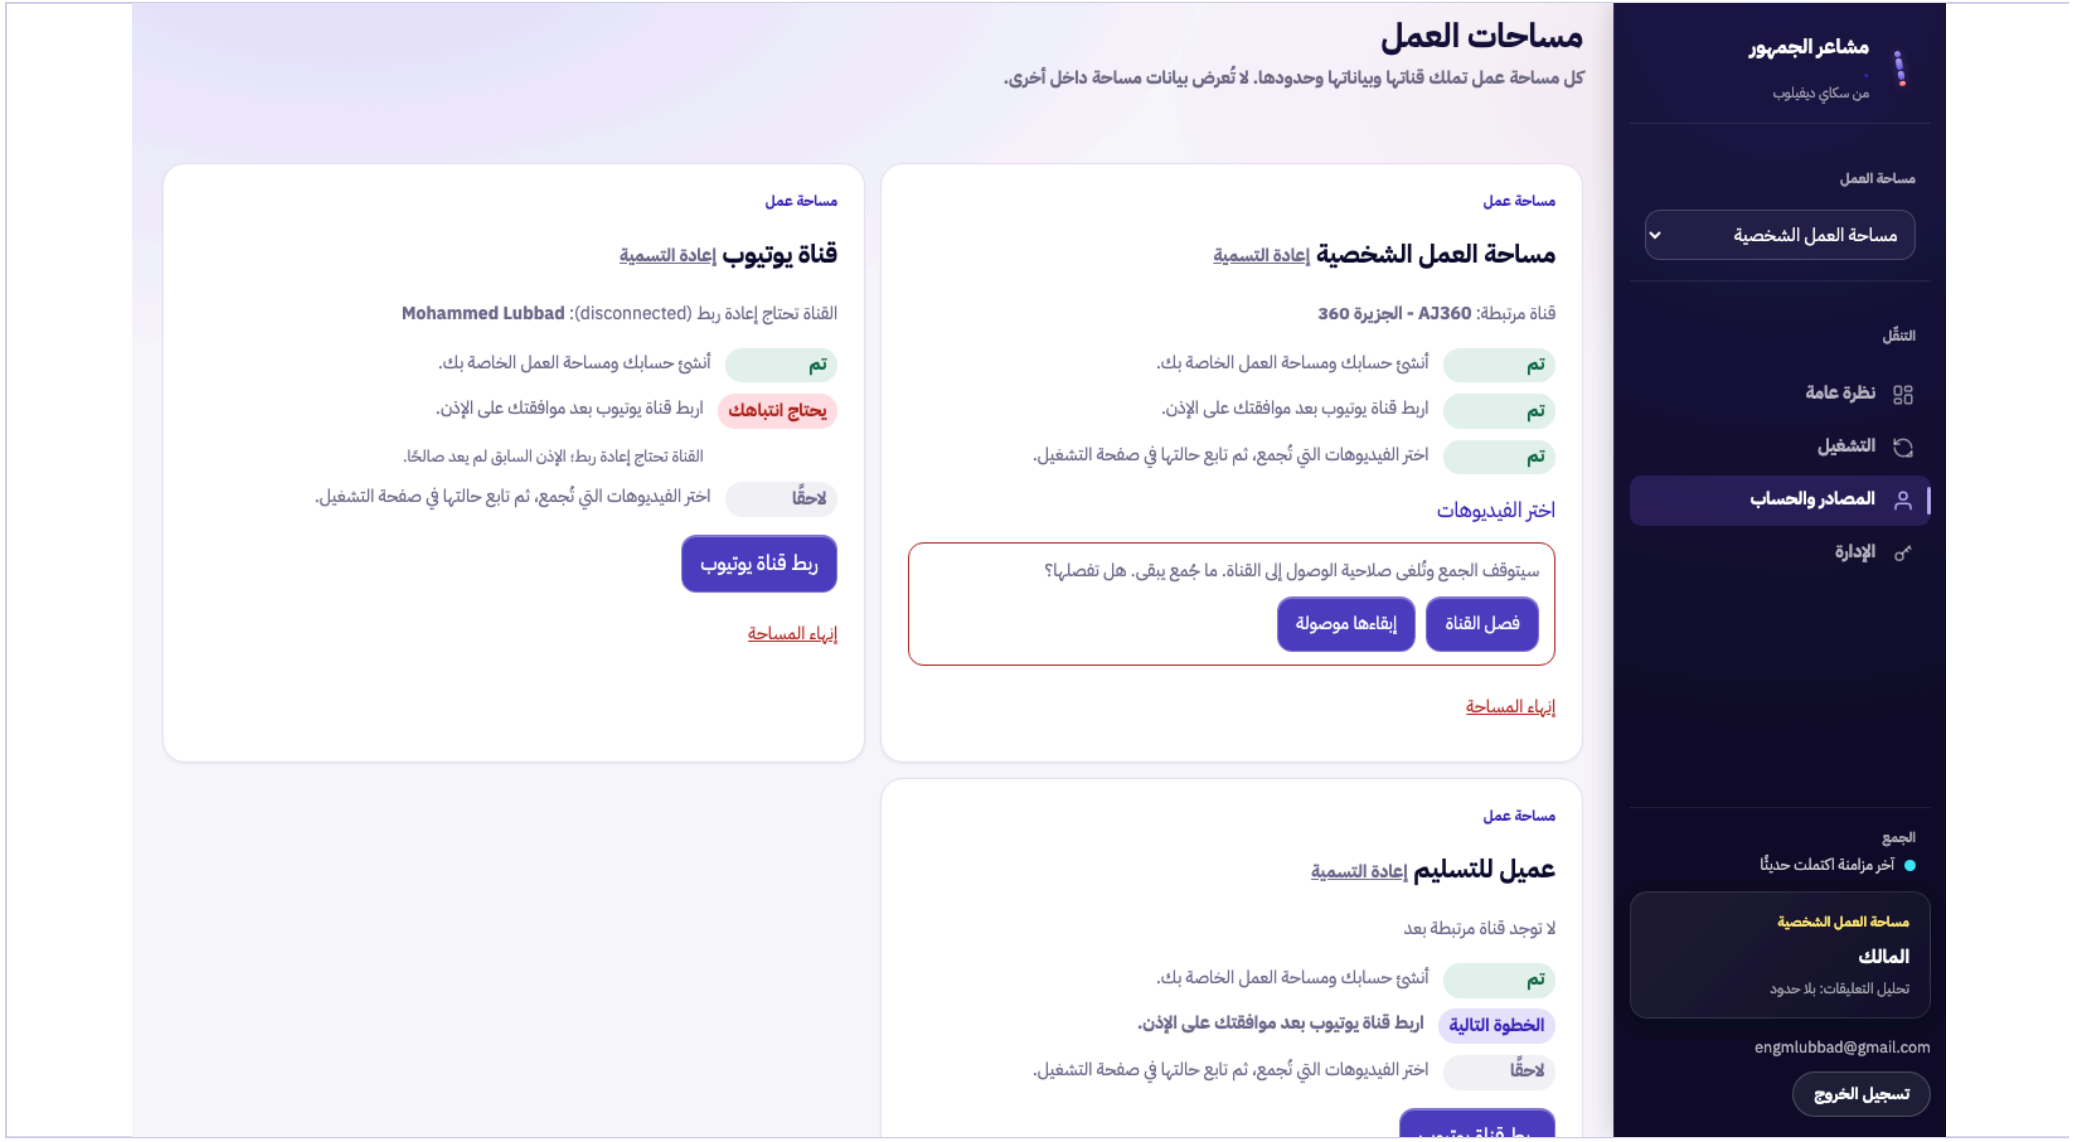

01-oauth-consent.png · `accounts.google.com/v3/signin/accountchooser` · 2026-09-16

(a) OAuth flow: the account chooser reached from the application's own 'connect a YouTube channel' button, continuing to the Supabase auth domain that fronts this OAuth client.

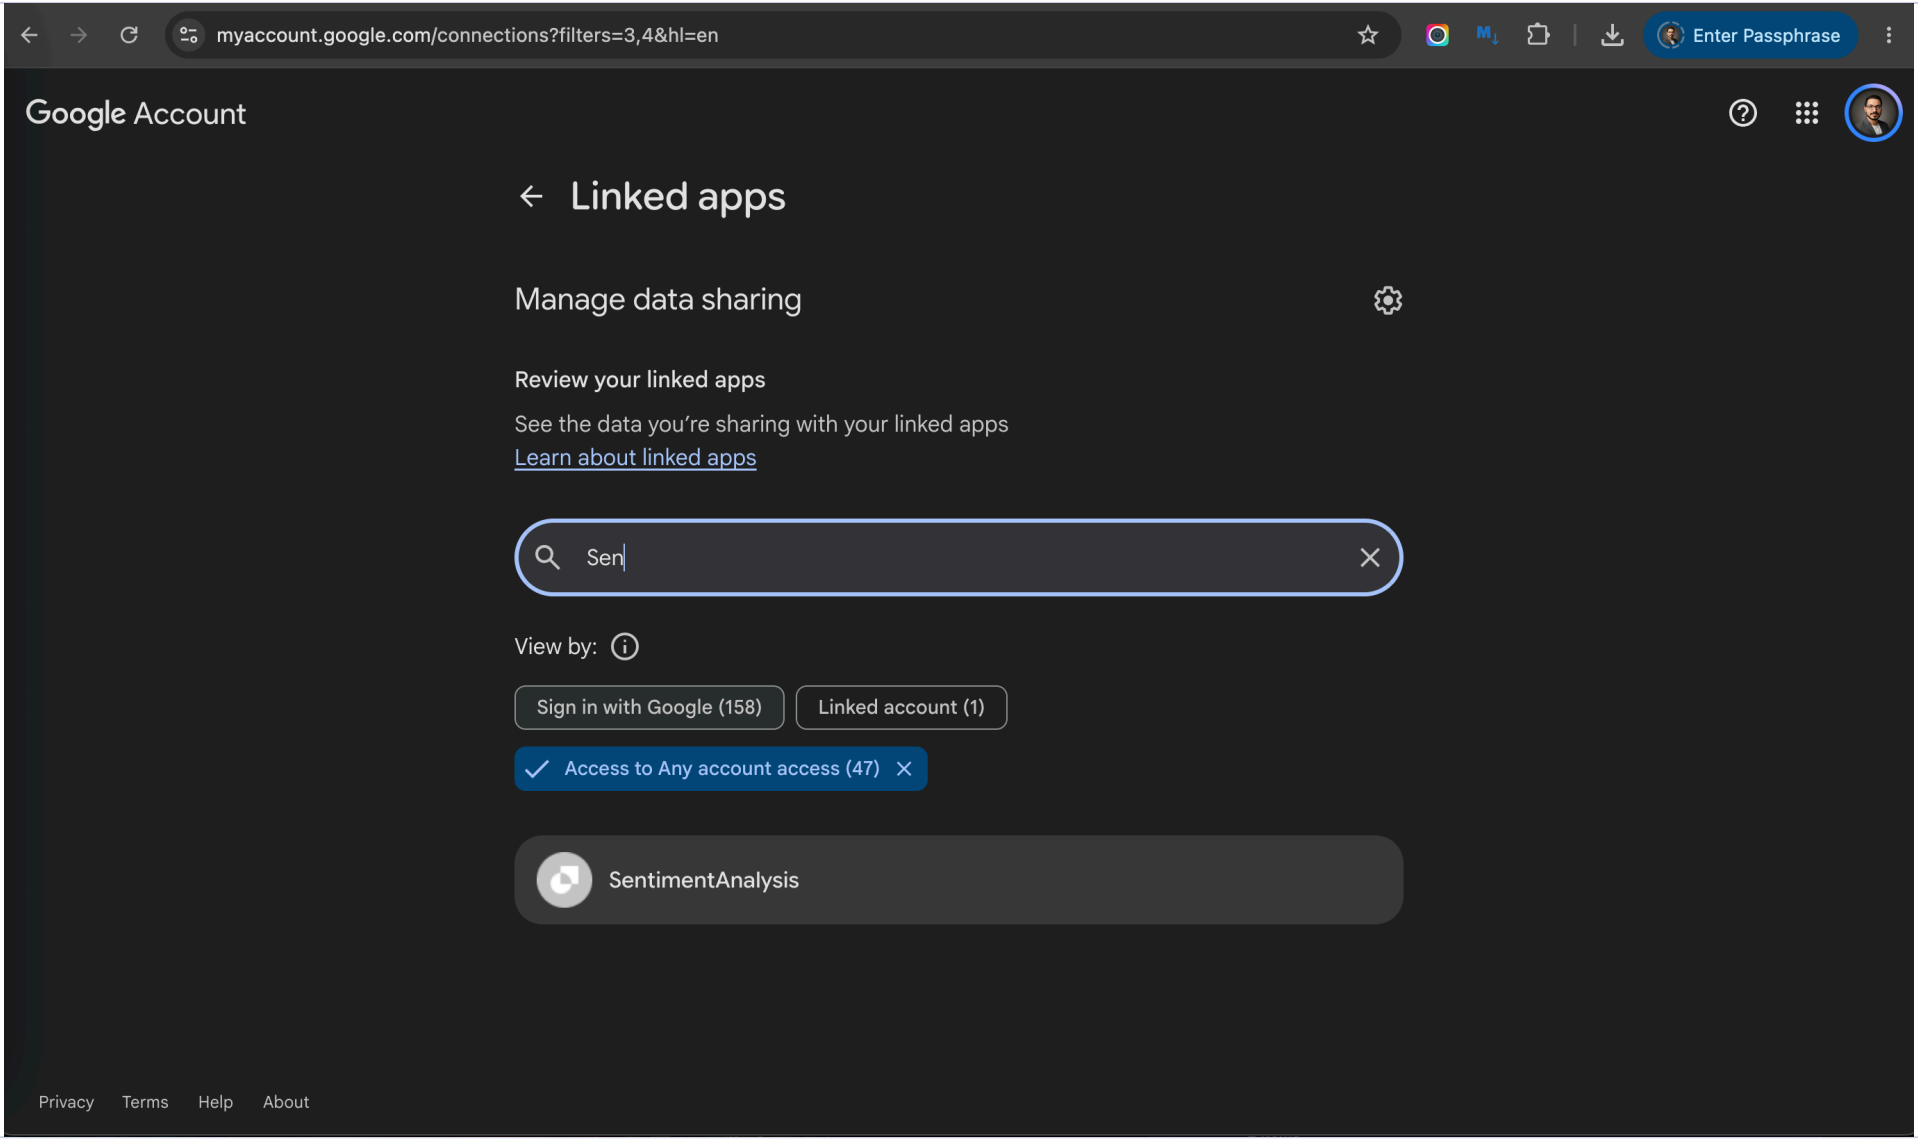

02-account-connected-disconnect.png · `https://app.sky-develop.net/account` · 2026-09-16

(a) OAuth flow — revocation inside the application: the connected channel (AJ360) with the 'disconnect channel' question open; confirming revokes the stored grant and cancels scheduled reads. Also visible: a retired workspace and the rename door.

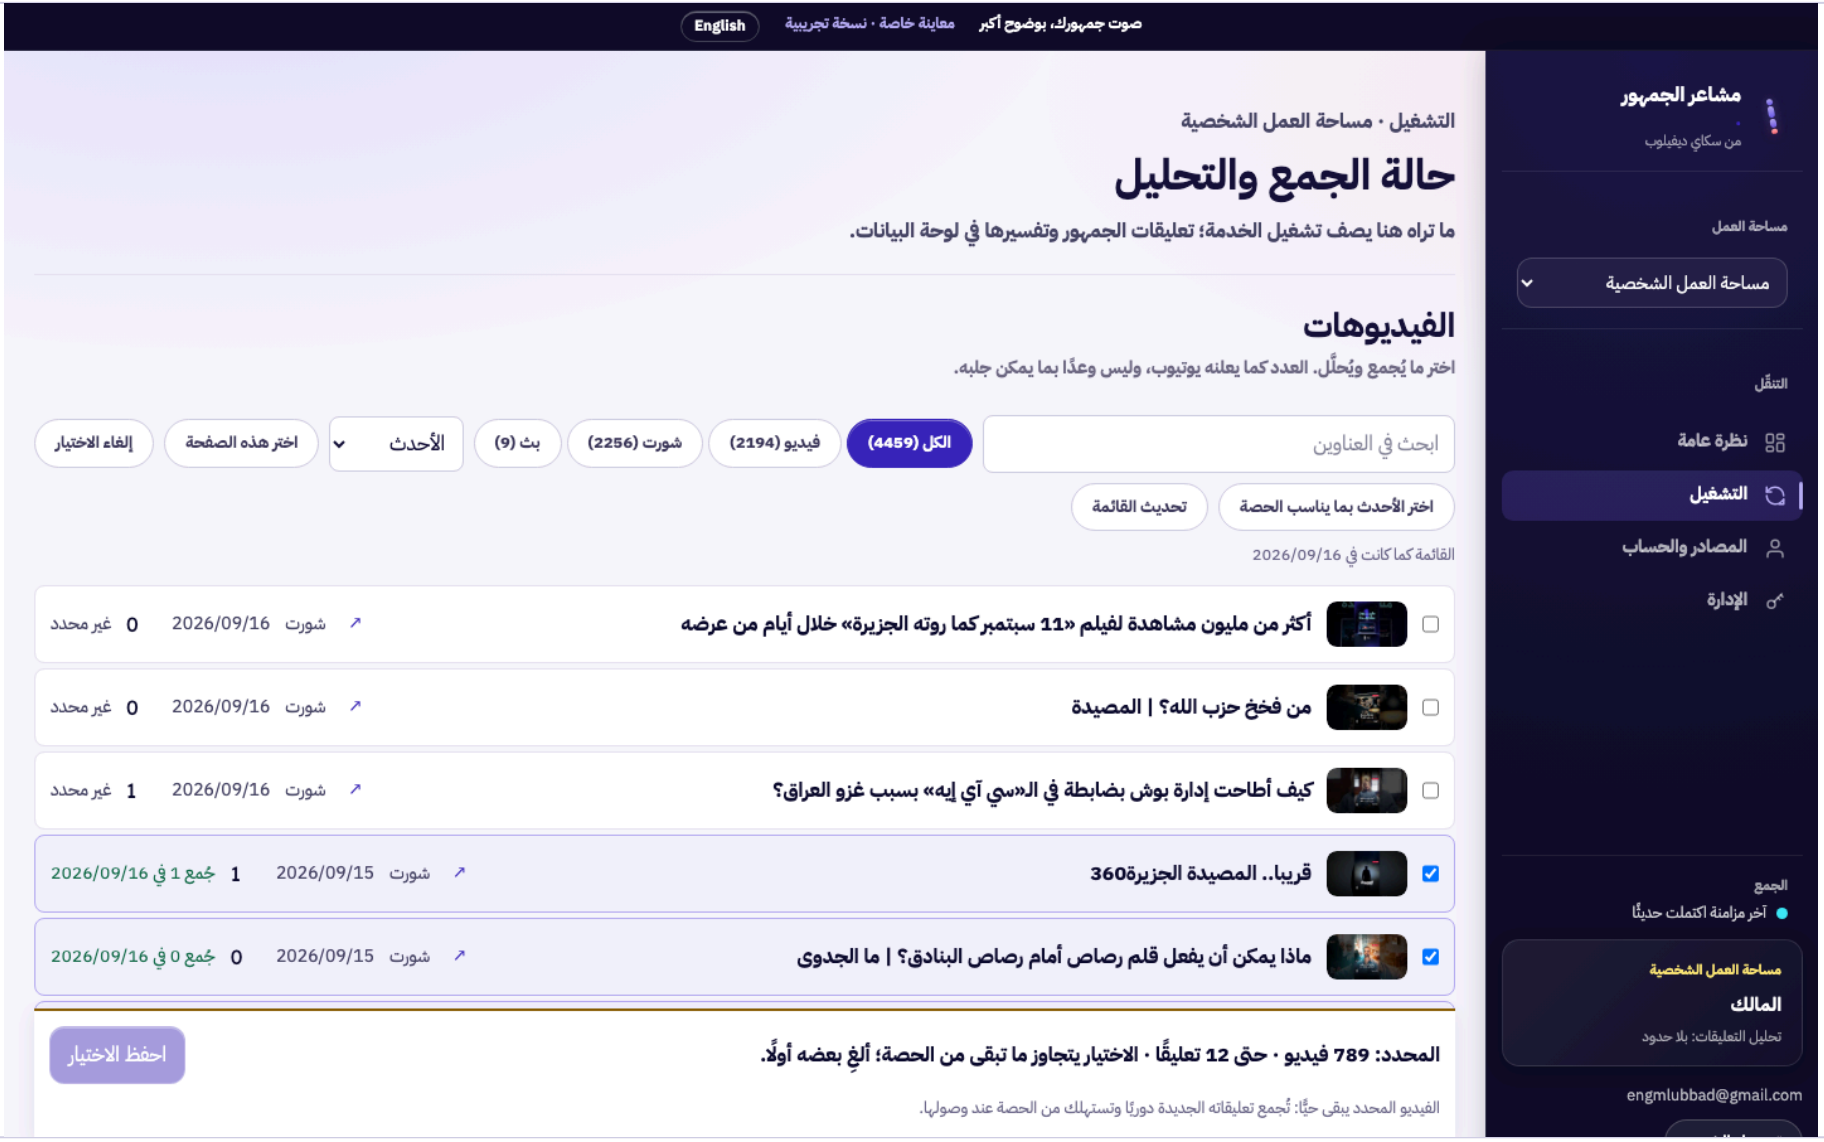

03-google-permissions.png · `https://myaccount.google.com/connections` · 2026-09-16

(a) OAuth flow — revocation at Google: 'SentimentAnalysis' listed under linked apps with access; removing it makes the next API call fail with invalid_grant and the application marks the channel for reconnection.

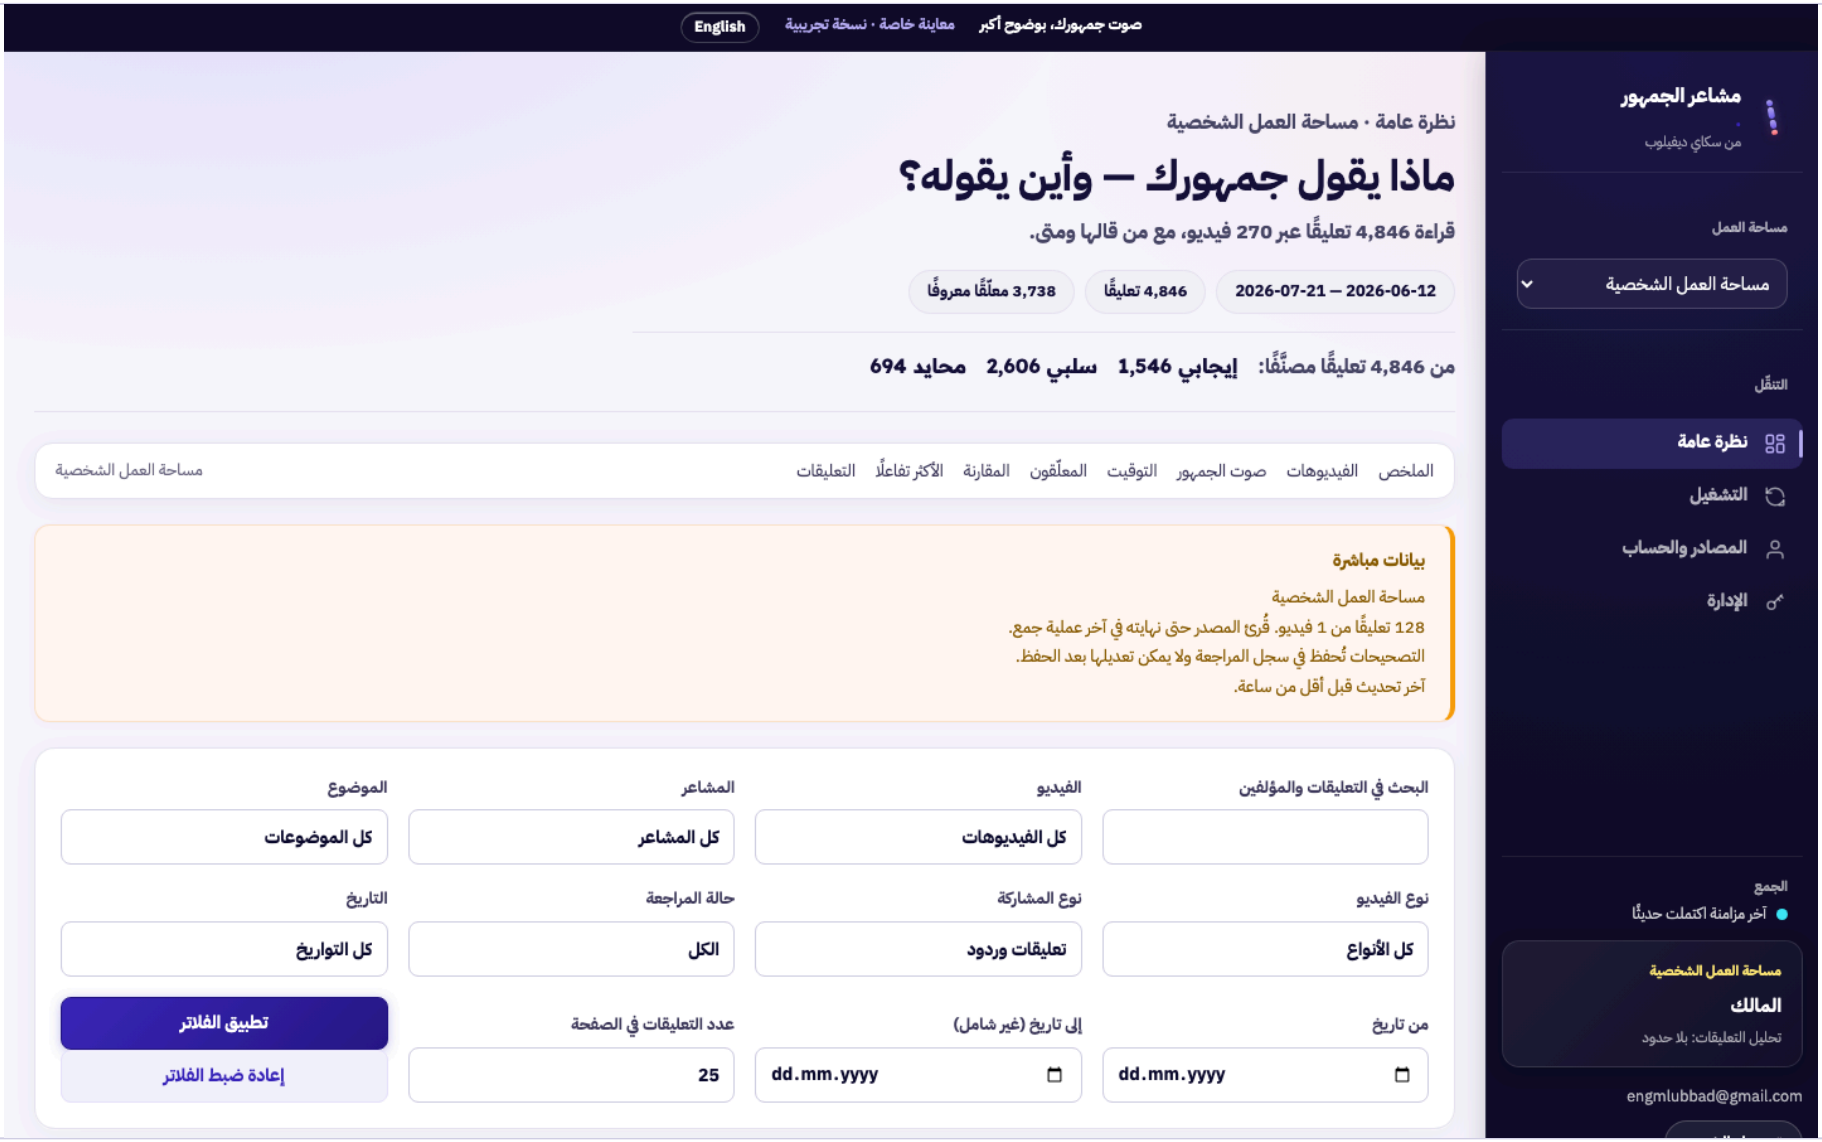

04-catalogue-comment-counts.png · `https://app.sky-develop.net/sync` · 2026-09-16

(d) Dashboard — the catalogue: 4,459 uploads with YouTube's reported comment counts, the owner's selection, and the plan budget line. Selection precedes any comment read.

05-dashboard-summary.png · `https://app.sky-develop.net/dashboard` · 2026-09-16

(d) Dashboard — sentiment and topic overview for the selected videos; YouTube data shown as YouTube's, our classification shown as ours.

06-comments-table-labels.png · `https://app.sky-develop.net/dashboard#comments` · 2026-09-16

(d) Dashboard — the comments themselves with the model's sentiment label and confidence on each; sort by likes, date, or negative.
